Subject Index

Activated transport, 287
Aging, 261
Air/CFC-12, 177
Ammonium paratungstate, 55
Asymmetric membrane, 89

Biotechnology, 71
Bi-phasic extraction, 293

Carrier-mediated transport, 281
Catalytic dehydrogenation, 163
Ceramic membranes, 79, 287
Charged membrane, 293
Chemical cleaning, 147
Composite membranes, 71, 163
Concentration polarization, 187
Coupled transport through SLM, 227
Crystals production, 55

Dehydration, 287
Dehydrogenation, 63
Diffusion, 121
Dynamically formed membranes, 121

Electroosmosis, 203
Electrostatic rejection, 293
Emulsion liquid membrane, 55

Fiber membranes, 31
Fine particles production, 55
Flux recovery, 147
Fouling, 1, 23, 71
Fractal dimension, 113

Gas permeability, 137, 261
Gas separation, 177
Gas separations, 31, 79, 273
Gas transport, 89

Hollow-fiber, 177
Hydrogels, 71
Hydrogen bonding index, 137
Hydrogen-bonding interaction, 51
Hydrophilization, 249
Hydroxyl terminated polybutadiene, 137

Image analysis, 113
Impregnated with *N*-octadecanoyl-*N*-phenylhydroxylamine, 43
Inorganic membranes, 1, 79

Liquid–liquid extraction, 281
Liquid permeability and separations, 203

Mathematical model, 163
Membrane contamination, 261
Membrane morphology, 113
Membrane preparation and structure, 79
Membrane reactor, 63
Membrane reactors, 163
Membrane selectivity, 63
Microfiltration, 1, 23, 147
Microporous and porous membranes, 163, 187, 273
Microporous membrane, 43
Modeling, 63
Modelling of transport process, 217
Model parameters for transparent, 227
Modules, 31

Organic–organic separation, 287
Organic templates, 273
Oxygen enriched air, 31

Partition coefficient, 293
Permeation rate, 177
Perstraction, 293
Pervaporation, 51, 287
Phase inversion, 121
Photochemical modification of membranes, 237
Platinum(IV), 281
Poly(1-trimethylsilyl-1-propyne), 261
Poly(arylsulfone), 237, 249
Poly(ether sulfone), 249
Polyimide membrane, 177
Polyoxyethylene grafting nylon 6, 51
Polyurethane membrane, 137
Pore formation mechanism, 113
Pore size distribution, 203
Protein adsorption, 237, 249

0376-7388/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved
SSDI 0376-7388(95)9999-Z

8-Quinolinol derivative, 281

Reactant loss, 63
Removal mechanism, 147

Selective separation of cyclohexanone and cyclohexanol, 51
Selective separation of Ga^{3+}, 43
Separation factor, 177
Spectral theory, 187
Starch, 1
Supported liquid membrane, 217, 281
Surface defects, 89
Surface treatment, 31

Temperature and pressure, 89
Theory, 203
Transport of Zn(II)–cyanex 272 complexes, 217
Turbulence, 187
Two membranes in series, 23

Ultrafiltration, 71, 187, 203, 249
Ultrafiltration membranes, 237
Unit-operation combination, 55
UV-induced grafting, 237, 249

Vacuum pump oil vapor, 261

Whey proteins, 147

Zeolite membrane, 79
Zn(II)–cyanex 272–kerosene system, 227
